PROFESSIONAL EXPERIENCE

AI Plans | *Product Designer + Engineer*

May 2025 – July 2026

- Led the **complete website redesign** and built a functional **design system**.
- Built an **in-house event platform** supporting multiple ticket types, ticket-specific questions, custom information tabs, project submissions, calendar flows, and **regional organizer/host views across countries**; attracted **500+ attendees worldwide** and generated **€1K+** in ticket revenue.
- Designed and engineered the **Moonshot Alignment Program** landing page, generating **290+ applications**, including **100+ PhD researchers** and senior engineers from **Meta, AWS, AMD, and Microsoft**.
- Built the course platform supporting standalone and cohort-based courses for **40+ students**, with **Stripe payment integration**, an admin CMS, and a custom instructor call-booking system with program-level scheduling constraints; improved the learning experience by reducing **individual lesson load times by up to 99.98%** through selective data fetching, lazy loading, shimmer loading states, and **Cloudinary**-backed media delivery, while enabling returning students to reach their lesson from the homepage in **<5s**.

Tech Stack: Vue.js, JavaScript, Express.js, Bun.js, PocketBase, TailwindCSS, Stripe.js, Google Calendar API, Cloudinary, Marked.js, Highlight.js

PROJECTS

Send a Letter 🔗 | *React.js, Fabric.js, TailwindCSS, Framer*

- Designed and developed an interactive web app for creating and sharing **personalized digital letters**, with a visual editor and streamlined creation flow used by **50+ users**.
- Implemented **Cloudinary image optimization** with transformed delivery URLs to improve asset delivery and page performance, and built **secure shareable links** for private letter delivery without requiring recipient accounts.

thRadar – Threat Intelligence Platform 🔗 | *React.js, Node.js, Express.js, MongoDB, Python*

- Built a **full-stack threat intelligence platform** integrating IP intelligence, phishing URL detection, password breach analysis, and global threat visualization into a single interface.
- Automated ingestion and enrichment of **10,000+ malicious IPs daily** using AbuseIPDB and IP2Location with Python and scheduled automation.
- Developed an interactive **3D threat map** using Three.js and three-globe to visualize **10,000+ malicious IPs** and the **top 100 weekly Layer 7 attacks** from Cloudflare Radar.
- Designed **REST APIs, MongoDB schemas, database indexes, and cloud deployments** with modular frontend, backend, and automation architecture.

SKILLS

Frontend: React.js, Vue.js, JavaScript, TypeScript, HTML, CSS, TailwindCSS, Redux, Vitest

Database: MongoDB, PostgreSQL, SQL, PocketBase

Version Control: Git, GitHub

Accessibility: WCAG, Accessible UI/UX

Backend: Node.js, Bun.js, Express.js, JWT, WebSockets

APIs & Services: REST APIs, Stripe, Google Calendar API, Cloudinary

Design: Figma, Framer, Affinity, Canva, Design Systems

EDUCATION

Bachelor of Science in Computer Science

Patkar Varde College, University of Mumbai

April 2026

CGPA: 8.89/10.0

ACHIEVEMENTS

ICCSAS '25 – International Conference on Computing, STEM and Applied Sciences 🔗

March 2025

Won the **Best Paper Presenter** award (Track 06: Technology) for “*Quantum Cryptography Algorithms Assessment: A Comprehensive Study Using IBM’s Qiskit Framework*”.
