SUMMARY

Full-stack developer experienced across the entire web application lifecycle – frontend, backend, database, and deployment. Builds production platforms end to end: React/JavaScript interfaces, Node.js/Bun.js APIs, MongoDB data layers, and third-party integrations (Stripe, Google Calendar, Cloudinary). Track record of shipping event, course, and content platforms from zero to production with measurable performance and adoption gains.

PROFESSIONAL EXPERIENCE

AI Plans | Full-Stack Developer

November 2024 – September 2026

- Led the **complete website redesign** end to end (frontend architecture, component library, and backend integration) and built a functional **design system**.
- Built a **full-stack in-house event platform** (React.js frontend, Node/PocketBase backend) supporting multiple ticket types, ticket-specific questions, custom information tabs, project submissions, calendar flows, and **regional organizer/host views across countries**; attracted **500+ attendees worldwide** and generated **€1K+** in ticket revenue.
- Designed and engineered the **Moonshot Alignment Program** full-stack landing page and application pipeline, generating **290+ applications**, including **100+ PhD researchers** and senior engineers from **Meta, AWS, AMD, and Microsoft**.
- Built a **full-stack course platform** (React frontend, backend APIs, database schema) supporting standalone and cohort-based courses for **40+ students**, with **Stripe payment integration**, an admin CMS, and a custom instructor call-booking system with program-level scheduling constraints; improved the learning experience by reducing **individual lesson load times by up to 99.98%** through selective data fetching, lazy loading, shimmer loading states, and **Cloudinary**-backed media delivery, while enabling returning students to reach their lesson from the homepage in **<5s**.

Tech Stack: React.js, JavaScript, Bun.js, Node.js, PocketBase, TailwindCSS, Stripe.js, REST APIs, Google Calendar API, Cloudinary, Marked.js, Highlight.js

PROJECTS

Send a Letter | Full-Stack – React.js, Fabric.js, TailwindCSS, Framer

- Designed and developed an interactive **full-stack web app** for creating and sharing **personalized digital letters**, with a visual editor and streamlined creation flow used by **50+ users**.
- Implemented **Cloudinary image optimization** with transformed delivery URLs to improve asset delivery and page performance, and built **secure shareable links** (backend link generation) for private letter delivery without requiring recipient accounts.

thRadar – Threat Intelligence Platform | Full-Stack – React.js, Node.js, Express.js, MongoDB, Python

- Built a **full-stack threat intelligence platform** (React frontend, Express/Node.js backend, MongoDB) integrating IP intelligence, phishing URL detection, password breach analysis, and global threat visualization into a single interface.
- Automated ingestion and enrichment of **10,000+ malicious IPs daily** using AbuseIPDB and IP2Location with Python and scheduled automation.
- Developed an interactive **3D threat map** using Three.js and three-globe to visualize **10,000+ malicious IPs** and the **top 100 weekly Layer 7 attacks** from Cloudflare Radar.
- Designed **REST APIs, MongoDB schemas, database indexes, and cloud deployments** with modular frontend, backend, and automation architecture.

TECHNICAL SKILLS

Frontend: React.js, Vue.js, JavaScript, TypeScript, HTML, CSS, TailwindCSS, Redux

Backend: Node.js, Bun.js, Express.js, JWT, REST APIs

Database: MongoDB, SQL

APIs & Integrations: Stripe, Google Calendar API, Cloudinary

Tools & Version Control: Git, GitHub

Design: Figma, Framer, Affinity, Canva, Design Systems

Accessibility: WCAG, Accessible UI/UX

ACHIEVEMENTS

ICCSAS '25 – International Conference on Computing, STEM and Applied Sciences

March 2025

Won the **Best Paper Presenter** award (Track 06: Technology) for “*Quantum Cryptography Algorithms Assessment: A Comprehensive Study Using IBM’s Qiskit Framework*”.

NASA Open Science Qualification – National Aeronautics and Space Administration

December 2024

Earned a verified **Open Science** credential from **NASA** (Credly-badged), recognizing training in open, transparent, and reproducible scientific research practices.

EDUCATION

Bachelor of Science in Computer Science

Patkar Varde College, University of Mumbai

April 2026

CGPA: 8.89/10.0
