SUMMARY

Product designer with 2 years of experience designing and building web products, with a strong technical background in web development. I use AI as part of my design workflow to explore ideas, research problems, iterate on concepts, and move quickly from rough ideas to working interfaces. Because I can also code, I can take a product from problem definition and UX through visual design and implementation, making practical decisions across the whole process.

290+ applications driven by one landing page design **99.98%** faster guide load times after a UX/perf redesign **500+** attendees across designed event flows

PROFESSIONAL EXPERIENCE

AI Plans | *Product Designer*

November 2024 – September 2026

- Led the **complete website redesign** end to end (Figma concept through production React.js) and built a functional **design system** spanning components, typography, spacing, and color.
- Designed and developed the **Moonshot Alignment Program** landing page, translating a complex AI-safety research program into a clear, structured application experience; generated **290+ applications**, including **100+ PhD researchers** and senior engineers from **Meta, AWS, AMD, and Microsoft**.
- Designed **search and discovery flows** with contextual autocomplete across research papers, plans, comments, and guides, and restructured the **information architecture** connecting courses, tutorials, and guides into one coherent learning journey for **40+ students**.
- Designed the course platform's **checkout and booking experience** (Stripe, admin CMS, instructor scheduling); identified performance-driven UX friction in the guide-reading experience and redesigned content delivery with **Cloudinary**, cutting load times by up to **99.98%** and getting returning students to their lesson in **<5s**.
- Designed the in-house event platform's **ticketing and organizer/host flows** across countries, and refined the **guide review and feedback** experience – including a feedback flow routed directly to the team via Discord webhook – attracting **500+ attendees worldwide** and **€1K+** in ticket revenue.

Tools & Stack: Figma, Excalidraw, Canva, React.js, JavaScript, TailwindCSS, Framer Motion, PocketBase, Stripe.js, Cloudinary

PROJECTS

Send a Letter | *Product Design & Development – Figma, React.js, Fabric.js, TailwindCSS, Framer*

- Designed and developed an interactive web app for creating and sharing **personalized digital letters**, owning the **visual editor UI/UX** and end-to-end creation flow, used by **50+ users**.
- Designed the canvas-based editing and live-preview interaction model, then implemented it with **Cloudinary**-optimized asset delivery and **secure shareable links** for private, account-free letter delivery.

ILIAD – Visual Identity & Logo Design | *Brand Design – Affinity Designer*

- Designed a complete **visual identity system** for ILIAD in a **9-day sprint** using **Affinity Designer**, including **5+ logo concepts**, supporting patterns, a color system, and typeface selection.
- Balanced **brand concept, symbolism, and scalability** (favicon through merchandise) while keeping the identity consistent across every touchpoint.

thRadar – Threat Intelligence Platform | *React.js, Node.js, Express.js, MongoDB, Python*

- Designed and built the interface for a **full-stack threat intelligence platform**, unifying IP intelligence, phishing detection, password breach analysis, and an interactive **3D threat map** (Three.js) into a single, readable dashboard for **10,000+ daily data points**.

SKILLS

Product & UX Design: Figma, Framer, Affinity Designer, Illustrator, Photoshop, Canva, Wireframing & Prototyping, Information Architecture, Interaction Design, Design Systems, Usability

Frontend Development: React.js, JavaScript, TypeScript, HTML, CSS, TailwindCSS, Framer Motion

Collaboration & Delivery: Git, GitHub, Linear, Stripe, Cloudinary, REST APIs

Accessibility: WCAG, Accessible UI/UX

ACHIEVEMENTS

ICCSAS '25 – International Conference on Computing, STEM and Applied Sciences

March 2025

Won the **Best Paper Presenter** award (Track 06: Technology) for “*Quantum Cryptography Algorithms Assessment: A Comprehensive Study Using IBM's Qiskit Framework*”.

NASA Open Science Qualification – National Aeronautics and Space Administration

December 2024

Earned a verified **Open Science** credential from **NASA** (Credly-badged), recognizing training in open, transparent, and reproducible scientific research practices.

EDUCATION

Bachelor of Science in Computer Science

Patkar Varde College, University of Mumbai

April 2026

CGPA: 8.89/10.0
